Summary

Mid-level Full-Stack Developer specializing in Vue.js and Nuxt.js, with a track record of building scalable, production-ready web applications across the frontend and backend (Node.js and REST APIs). Strong in performance optimization (Core Web Vitals), accessibility, SEO, responsive UI design, multilingual (i18n) applications, and application architecture.

Experience

Mid-Level Frontend Developer, *YouLearnt* — 09/2025 – Present — Manchester, United Kingdom

- Accelerated site performance by 30% through image optimization, lazy loading, and font subsetting: page load down 1.5s, CLS down ~25%, FCP faster by ~20%, bounce rate down 20%, conversions up 5%.
- Achieved a 95+ Lighthouse accessibility score with WCAG guidelines, semantic HTML, keyboard navigation, and bi-weekly audits, cutting accessibility support tickets by 20% in six months.
- Boosted organic click-through rate by ~20% through JSON-LD schema markup, expanding rich result eligibility.
- Cut production debugging time by ~50% by enabling source maps for minified JavaScript and improving error traceability.

Frontend Developer, *Megatron Company* — 08/2024 – 09/2025 — Cairo, Egypt

- Lifted user retention by 25% by fixing crashes and tuning performance.
- Engineered interactive Tailwind CSS dashboards for 1,000+ users.
- Grew engagement by 20% through PWA features and multilingual support.

Web & IT Support, *Egyptian Armed Forces* — 04/2023 – 06/2024 — Cairo, Egypt

- Developed internal Node.js tools to automate reporting and maintained production web pages, resolving frontend issues across 7 application modules to ensure platform stability.

Education

Bachelor of Science in Computer Science — 09/2018 – 05/2022

Technical Skills

- JavaScript
- TypeScript
- Vue.js
- Nuxt.js
- Pinia
- Tailwind CSS
- HTML / CSS
- Vite
- Node.js
- Nest.js
- Express.js
- REST APIs
- MongoDB
- SQL
- Docker
- Git / GitHub
- Performance & SEO
- Accessibility (WCAG)

Projects

Book Store for Download & Reading Books 07/2025

Vue.js, Nuxt.js, Tailwind CSS

- Launched a book download and reading platform that raised average session duration by 30% and cut page load times by 40% through on-demand asset loading and advanced caching.

Comics Platform & Dashboard 12/2024

Nuxt.js, Vue.js, Tailwind CSS

- Created a responsive comic-viewing experience with simplified navigation, adding 15 minutes to average visit time, and scaled it with modular components and advanced state management for 35% faster rendering.

Resux — Resumable Full-Stack Web Framework

TypeScript · Vue SFC · Vite · Nitro · H3 · SSR · Vitest · Node.js

- Architected an experimental HTML-first framework built on 4 core capabilities: resumability, server-side rendering, performance optimization, and minimal client-side execution.
- Engineered a custom compiler and runtime supporting Vue-like SFCs, file-based routing, state serialization, resumable event handlers, and client-side navigation, plus 12 framework-level capabilities including middleware, plugins, layouts, data fetching, SEO, and i18n.
- Shipped CLI tooling for 6 workflows (scaffolding, builds, validation, deployment) and established 6 automated quality checks (testing, type checking, bundle-size analysis, CI), backed by documentation and production test apps.

TaskFlow — Full-Stack Task Management Application

Node.js · Express.js · MongoDB · Mongoose · REST API · Docker

- Created a full-stack task management app with a RESTful Node.js/Express backend, a 5-layer architecture (controller, route, model, middleware, utility), MongoDB persistence via Mongoose, pagination, request validation, and centralized error handling.
- Containerized the app with Docker, configured environment-based settings, and deployed it as a live production service.

Medical Corporate Platform

Nuxt.js · Vue.js · Tailwind CSS · Nuxt i18n · VueUse · VeeValidate

- Developed a large, responsive corporate platform with Nuxt and Vue using reusable component-based architecture, covering 7 sections: product, blog, career, partner, investment, contact, and corporate information.
- Delivered multilingual experiences with internationalized routing and applied SEO and performance techniques, including streamlined hydration, lazy-loaded media and fonts, and metadata.
